NANDHINIE V

B.E ELECTRONICS ENGINEERING(VLSI DESIGN AND TECHNOLOGY) | 3rd YEAR

📍 Rajalakshmi Institute of technology,Chennai | 📞 9840522501 | ✉️ nandhinievenkatesh@gmail.com

🔗Linkedlin:linkedin.com/in/nandhinie-v-65bb34344

PROFESSIONAL SUMMARY

Aspiring Electronics Engineering (VLSI Design & Technology) professional with an interest in digital design, semiconductor technologies, and hardware development. Familiar with VLSI concepts, programming, and embedded systems through academic projects and practical learning. A quick learner with strong problem-solving skills, seeking opportunities to gain industry experience and contribute to innovative hardware solutions.

EDUCATION

Rajalakshmi Institute of Technology,chennai -600126
BE ELECTRONICS ENGINEERING(VLSI DESIGN AND TECHNOLOGY)| 3rd Year | **CGPA** : 7.64
Higher Secondary : 64.2%
SSLC : 78.8%

TECHNICAL SKILLS

Programming: Python, C++
HDL: Verilog HDL – Basic
Digital/VLSI: Digital Electronics, Digital Circuit Design, VLSI – Learning
Hardware: FPGA – Learning, Analog Electronics – Learning
Embedded/IoT: Arduino, ESP8266, Microcontrollers, Basic IoT- Learning
Quantum Computing: Qubits, Superposition, Quantum Gates, Quantum Algorithms, Qiskit - Learning

PROJECTS

MedVision AI – AI-Powered Brain Tumor Detection

• Developed an AI-based prototype focused on brain tumor detection from medical images.
• Applied concepts related to artificial intelligence and image-based analysis.

Smart Helmet with Alcohol Detection & Ignition Control System

• Developed a smart helmet prototype for alcohol detection and vehicle ignition control.
• Integrated sensors and embedded hardware concepts to support rider safety.

AI-Driven Anomaly Detection in Component Burn-In & Screening

• Developed an AI-based anomaly detection system for electronic component burn-in and screening.
• Used sensor data and machine learning to identify normal, suspicious, and defective components at an early stage

Touch Sensor Using IC 555 Timer

• Designed a touch-sensing circuit using the IC 555 timer.
• Explored timer-based circuit operation and touch detection principles

CERTIFICATIONS & COURSES

- Programming in Java – NPTEL – Completed
- Patent Drafting for Beginners– NPTEL – Completed
- Entrepreneurship – NPTEL – In Progress
- Java Training – Spoken Tutorial , IIT Bombay – Completed
- Arduino Tutorial for Beginners. – Completed
- Introduction to IOT– Completed

WORKSHOP & ACTIVITIES

- Introduction to ARM Based System Design
- The Institution of Engineers (India) – IEI — Student Member – Rajalaxmi Institute of Technology
